GenIDA

An online study for patients and families

Parents and relatives, you can register on the *GenIDA* if:

- One of your child, brothers, sisters or close relatives has manifestations of **intellectual disabilities** (ID) and / or **autism** spectrum disorders (ASD).
- She/he has been diagnosed as **carrier of a genetic mutation** affecting a single gene or a small chromosomal segment and it has been concluded by a specialist that **this mutation is responsible** of the ID or ASD.
- You are interested in providing and updating health information that will be kept anonymous and that will help gaining better knowledge on the genetic condition that affects your child, sister, brother or relative.

How to participate to *GenIDA* ?

Create your account here: <https://genida.unistra.fr>

- Create your account by giving the required information, reading the **information note** and **accepting to participate** to this research project. Then connect to the private page of the website.
- In the « **Relative** » tab, give the different required information concerning your **child / relative** who is affected by ID and/or ASD. (You can create multiple relative accounts if necessary).
- Through the « **Questionnaire** » tab, participate directly to the medical data collection by answering to the questionnaire (estimated filling time: 45min)
